[2] Energy and Climate Change (EC)

[2.2] Smart Building implementation

	
<p>The Automatic Door Sensor System at RSP UNS</p>	<p>The Automatic Fire Alarm Sensor System at UNS Inn</p>
	
<p>CCTV as a security control system for monitoring the use of energy for education activities in class rooms as well as other activities conducted in the buildings of UNS</p>	

Description:

Some buildings in Universitas Sebelas Maret has been applied Smart Building components as required by Smart Building Council in terms of energy efficiency management. Smart building components has been applied for : automatic fire alarm sensor system and automatic water tap. These components have been used in the new construction buildings such as Medical Faculty Building, Library Building, Pusdiklat Building (UNS –Inn Building) and UNS University Hospital. For the old buildings, energy efficiency appliance usage will continuously replacing conventional appliances
