[3] Waste (WS)

[3.2] Recycling Program For University Waste

Description:

Domestic wastewater is the water that has been used by a community and which contains all the materials added to the water during its use. It is thus composed of human body wastes together with the water used for flushing toilets, and sullage, which is the wastewater resulting from personal washing, laundry, food preparation and the cleaning of kitchen utensils. This process is only the domestic waste water, not include toxic waste.

UNS operates Domestic Waste Water Treatment Instalation facilitated by the Ministry of Public Works and Spatial Plan, which treath domestic waste from Jebres Village settlements and domestic waste of campus usage .
